I'm a Full-Stack Developer with almost 4 years of experience and Master's student in Computer Engineering and Information Systems at the Polytechnic Institute of Viseu since last year. Experienced in developing dynamic and scalable applications, with a strong foundation in UI/UX design to create intuitive and user-friendly interfaces. Passionate about artificial intelligence and game development, always eager to explore innovative technologies and enhance digital experiences. A detail-oriented professional with problem-solving skills, a strong sense of teamwork, and the ability to work independently.

---

## Experience

APRIL 2021 – TODAY

**Full Stack Developer and Client Manager/Celeuma Creative Agency – Viseu, Portugal.**

When I started at the company I was only developing front-end for a few months, but as time went by, I started to be assigned to full-stack projects and nowadays, I'm the development team leader at Celeuma. My functions at the company, besides team leader, are full-stack developer, client manager and client hosting services manager. With some clients, I guide the process from the moment they speak to our company, until the end of the project, where the domain and hosting are configured and the project is published on the web. I also have insights about UX/UI design and sometimes work together with the design team to guide them to create an interface that better suits our clients. The projects I work in are mainly developed in PHP and MySQL, but some of them were developed with React.js and node.js.

FEBRUARY 2020 – JUNE 2020

**Front-End Developer – Curricular Internship/Softinsa – Viseu, Portugal.**

My curricular internship consisted in developing the front-end of a corporate website, with the aim to sell and rent construction vehicles, it was built with .NET, HTML, CSS and JavaScript/jQuery.
